Section 1: Hands-On Demonstration

Part 1: Complete Chain of Custody Procedures

7. Make a screen capture showing the contents of the search warrant in Adobe Reader.

14. Make a screen capture showing the completed Chain of Custody form in Adobe Reader.

The screenshot shows a PDF document titled "MaxwellKing_chain_of_custody_10001.pdf" open in Adobe Acrobat Reader DC. The document is a "Computer Evidence Chain of Custody" form for the "Police Cyber Crimes Division". The form is titled "Applying the Daubert Standard to Forensic Evidence (4e)-1" and "vWorkstation". The form is dated "2026-02-07 15:38:37" and signed by "Maxwell King". The form contains the following fields:

- Item Number(s): 1000-1
- Case: 10001-BPD-CCD
- To be completed by initial collector:
 - Evidence collected by (name): Hannah Jones
 - Date/Time collected: 1:35 PM, April 19, 2021
 - Evidence description: 1 disk image taken from seized dell laptop
 - Describe Collection method (include operating system, utility, commands, arguments, etc): disk image generated using FTK imager from Windows 10 workstation
 - What application software/utility is required to view the file?: FTK imager, E3, Autopsy, Encase, or comparable
 - Where is evidence initially stored?: Disk image is stored on BPD file server; source laptop stored in BPD police locker
 - How is evidence initially secured?: Windows BitLocker Encryption
 - Collector signature: [Signature]
 - Date: April 20, 2021
- Copy History:

Date	Copied By	Copy Method	Disposition of original and all copies
- Transfer History:
 - Transferred from (print name, sign & date): Brendan O'Rourke
 - Transferred to (print name, sign & date): Maxwell King 2/7/26
 - Where is evidence now stored?: vWorkstation
 - How is evidence now secured?: Windows BitLocker Encryption

The right sidebar of Adobe Reader shows the "Export PDF" panel with the "Convert" button highlighted. The document language is set to "English (U.S.)".

Part 2: Extract Evidence Files and Create Hash Codes with FTK Imager

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

34. Make a screen capture showing the contents of the 0002665_hash.csv file.

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

37. Make a screen capture showing the contents of the RecycleBinEvidence_hash.csv file.

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

38. Make a screen capture showing the contents of the **MyRussianMafiaBuddies_hash.csv** file.

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

39. Make a screen capture showing the contents of the Nice guys_hash.csv file.

Part 3: Verify Hash Codes with E3

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

14. Make a screen capture showing the MD5 and SHA1 values for the MyRussianMafiaBuddies.txt file.

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

16. Make a screen capture showing the MD5 and SHA1 values for the Nice Guys.png file.

17. **Describe** how the hash values produced by E3 for the incriminating files compare to those produced by FTK. Do they match?

Difficulty aside, the hash values do match.

Section 2: Applied Learning

Part 1: Extract Evidence Files and Create Hash Codes with FTK Imager

5. Make a screen capture showing the contents of the suspicious email file in the Display pane.

Applying the Daubert Standard to Forensic Evidence (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 01

16. Make a screen capture showing the **two hash values** for the suspicious email file.

Part 2: Verify Hash Codes with Autopsy

11. Make a screen capture showing the MD5 field in the Result Viewer.

12. Describe how the hash value produced by Autopsy compares to the values produced by FTK Imager for the two .eml files.

The MD5 hash from the original files and autopsy are the same. The other hash is SHA-256 not SHA1 so those are different.

Part 3: Verify Hash Codes with E3

7. Make a screen capture showing the MD5 value produced by E3.

8. Describe how the hash value produced by E3 compares to the values produced by FTK Imager for the two .eml files and the value produced by Autopsy.

They appear to be the same.

Section 3: Challenge and Analysis

Part 1: Verify Hash Codes on the Command Line

Make a screen capture showing the hash values for the Evidence_drive1.001 file.

Part 2: Locate Additional Evidence

Define the original file names and file paths for each of the three files.
