Section 1: Hands-On Demonstration

Part 1: Identify Forensic Evidence in an iOS Data Case

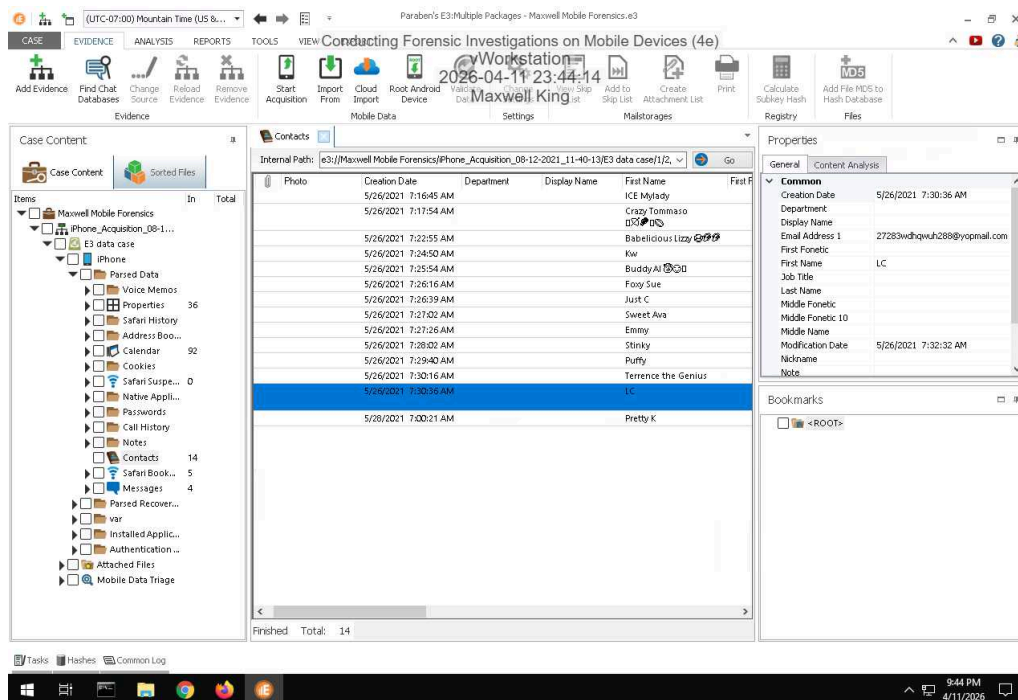

8. Make a screen capture showing the contents of the Properties pane.

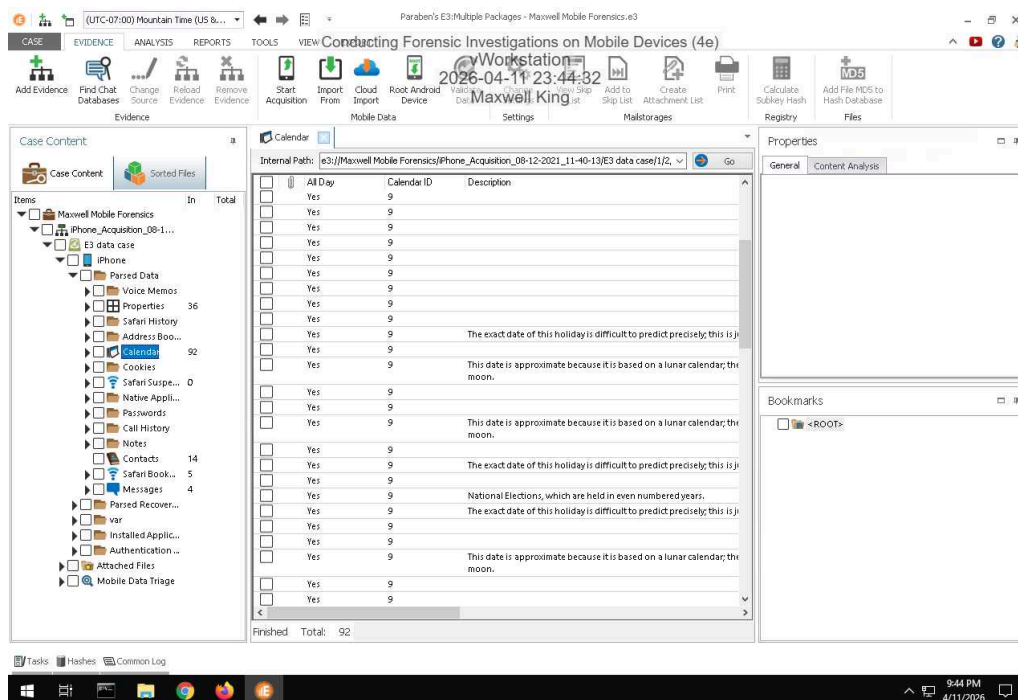

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

11. Make a screen capture showing the contents of the Contacts grid.

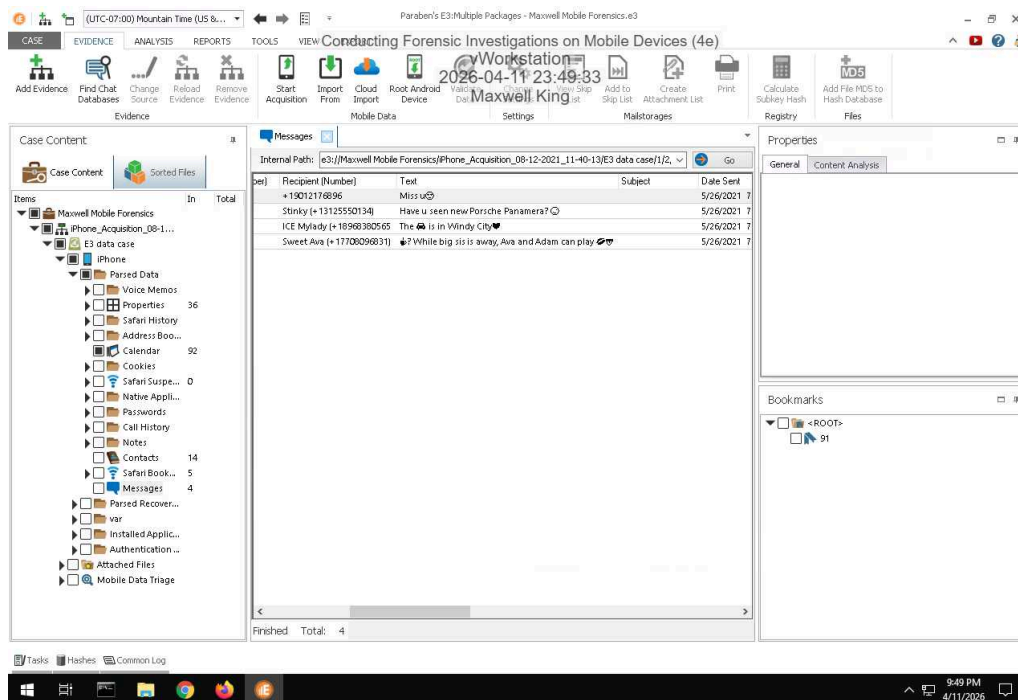

14. Make a screen capture showing the contents of the Calendar grid.

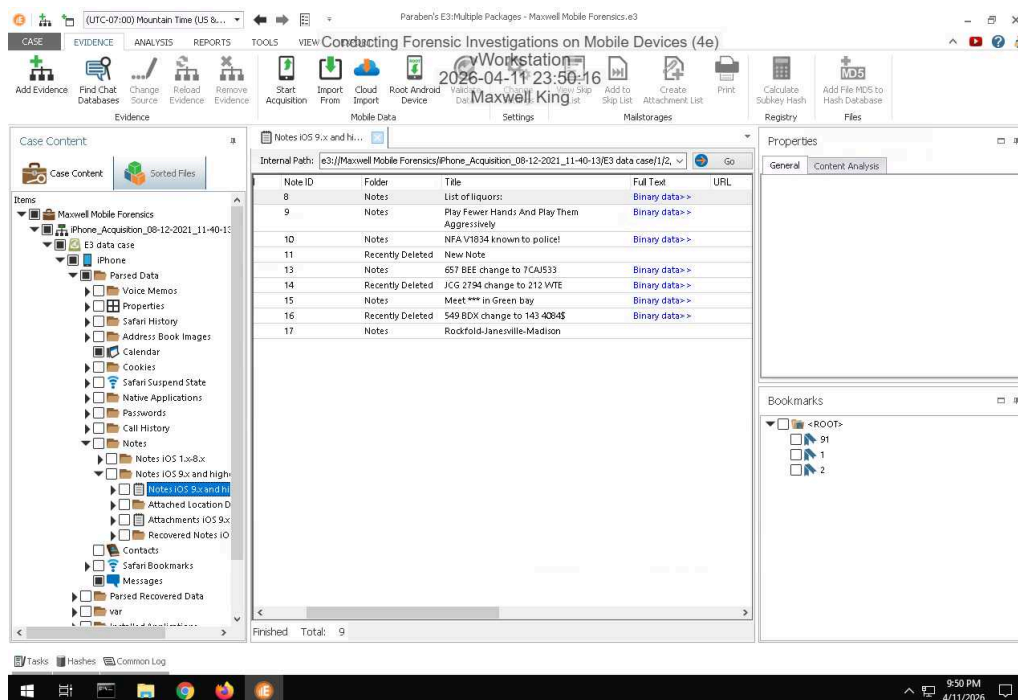

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

20. Make a screen capture showing the contents of the Messages grid.

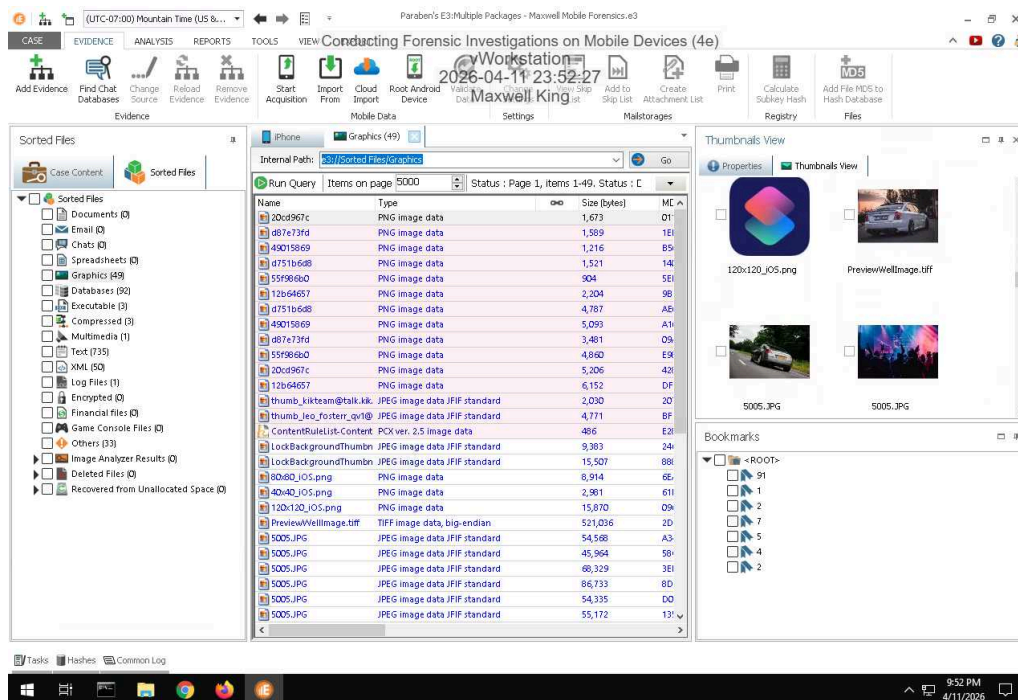

24. Make a screen capture showing the contents of the Notes grid.

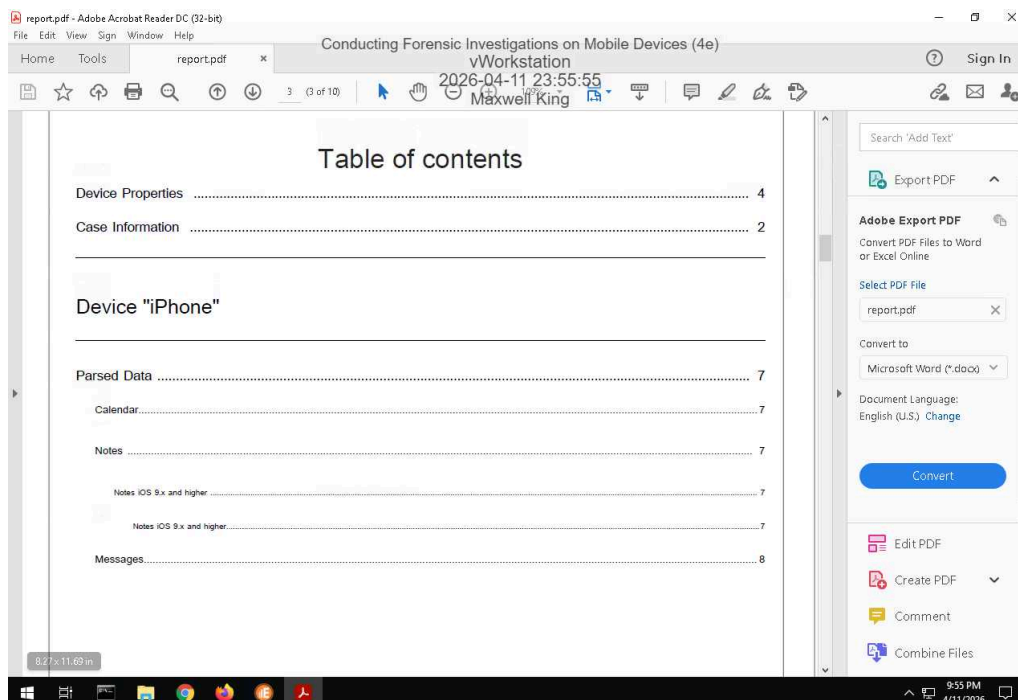

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

34. Make a screen capture showing at least two car pictures in the Thumbnail View.

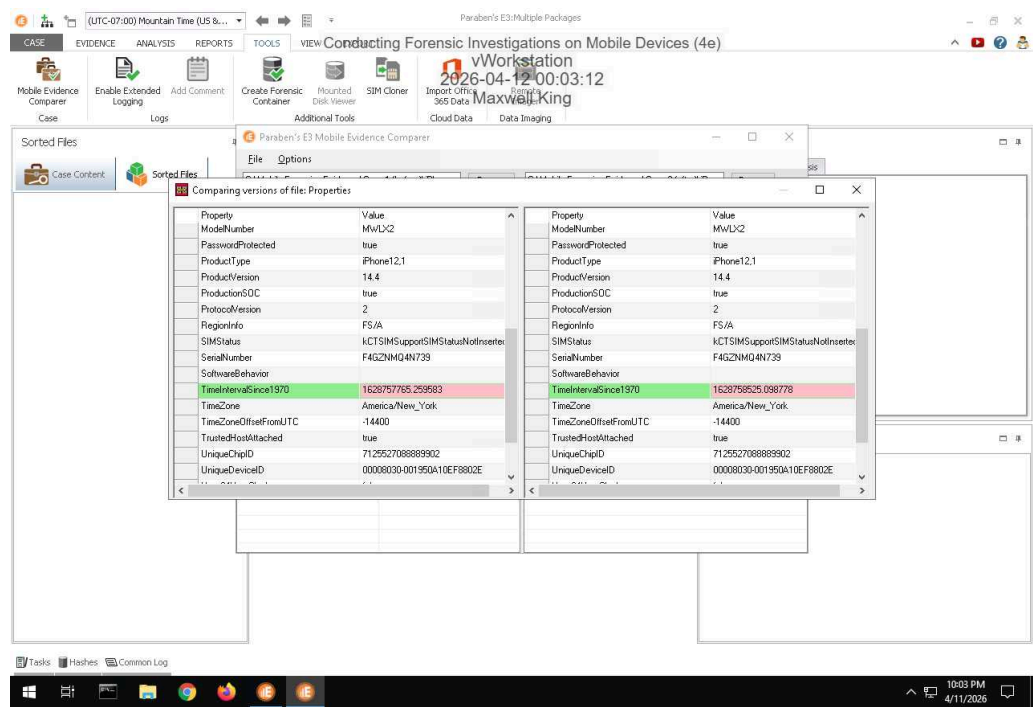

44. Make a screen capture showing the Table of contents in the investigative report.

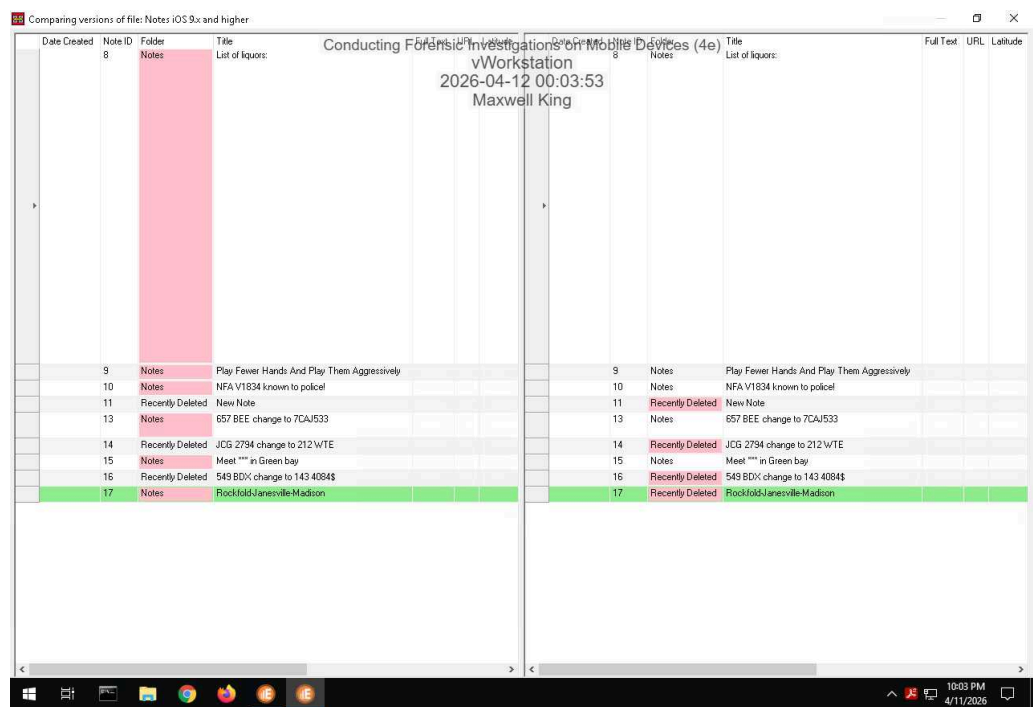

Part 2: Compare iOS Data Cases

10. Make a screen capture showing the difference in data case properties.

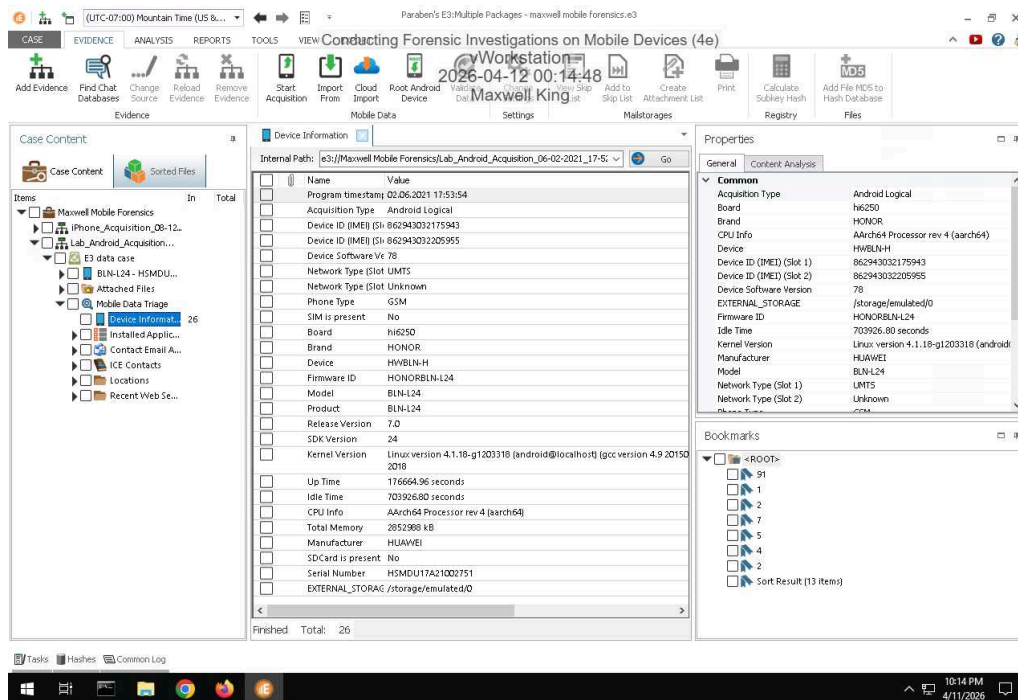

15. Make a screen capture showing the additional note in the newer data case.

Section 2: Applied Learning

Part 1: Identify Forensic Evidence in Android User Data

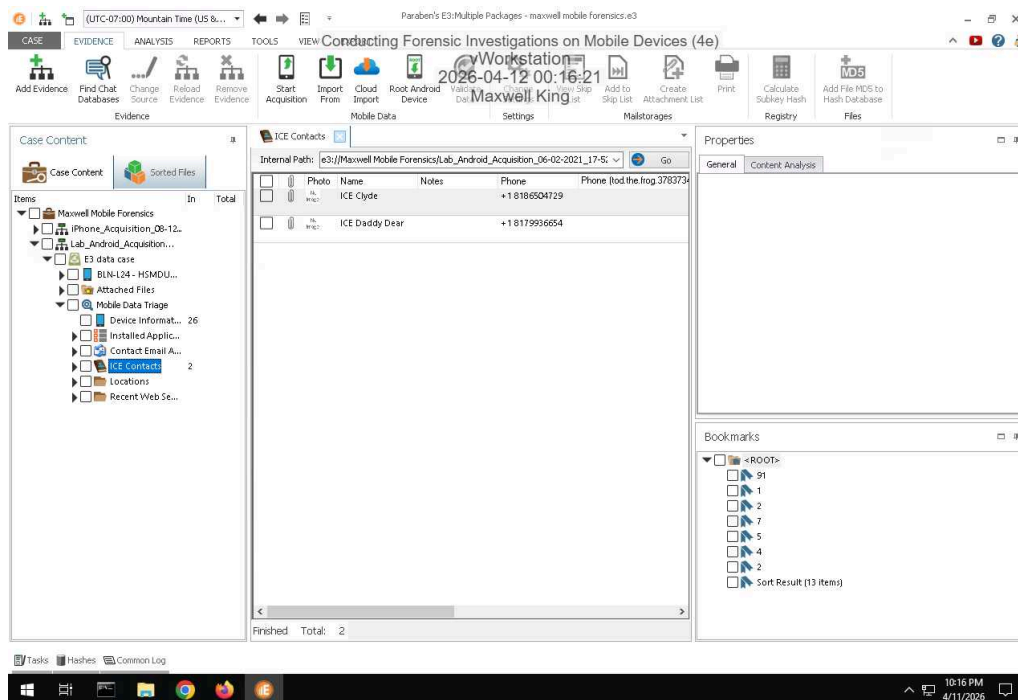

7. Make a screen capture showing the Device Information.

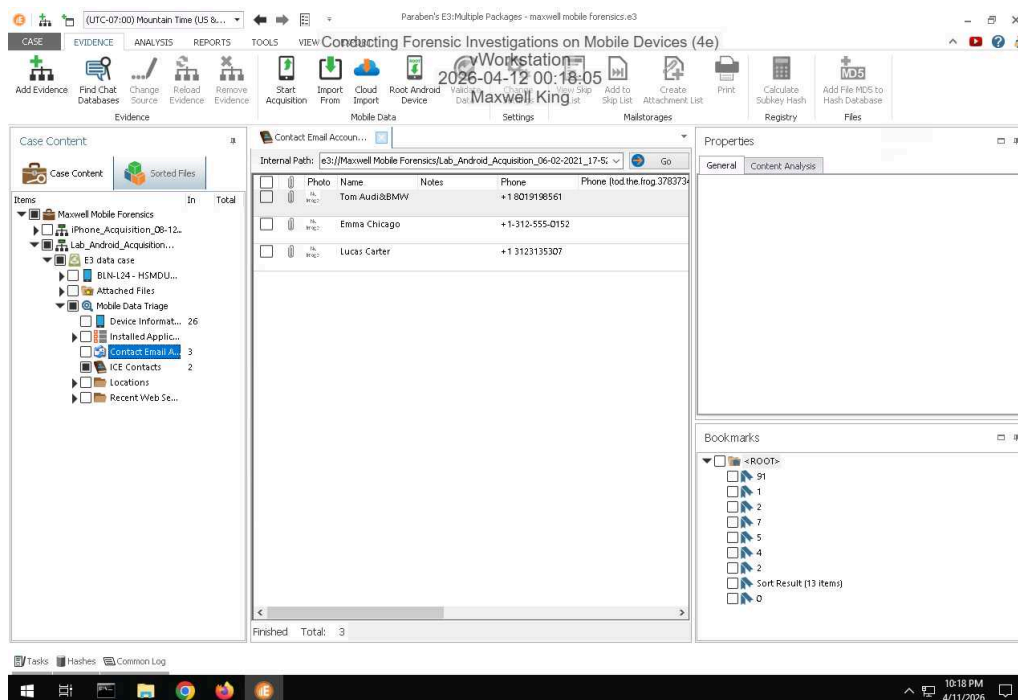

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

9. Make a screen capture showing the ICE Contacts.

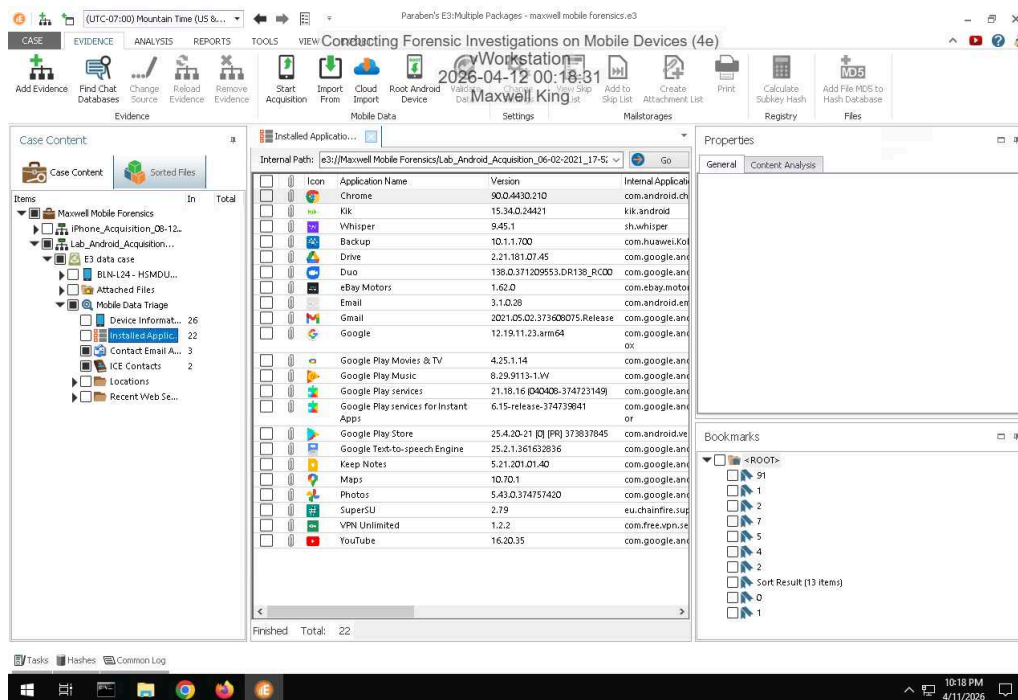

12. Make a screen capture showing the Contact Email Accounts.

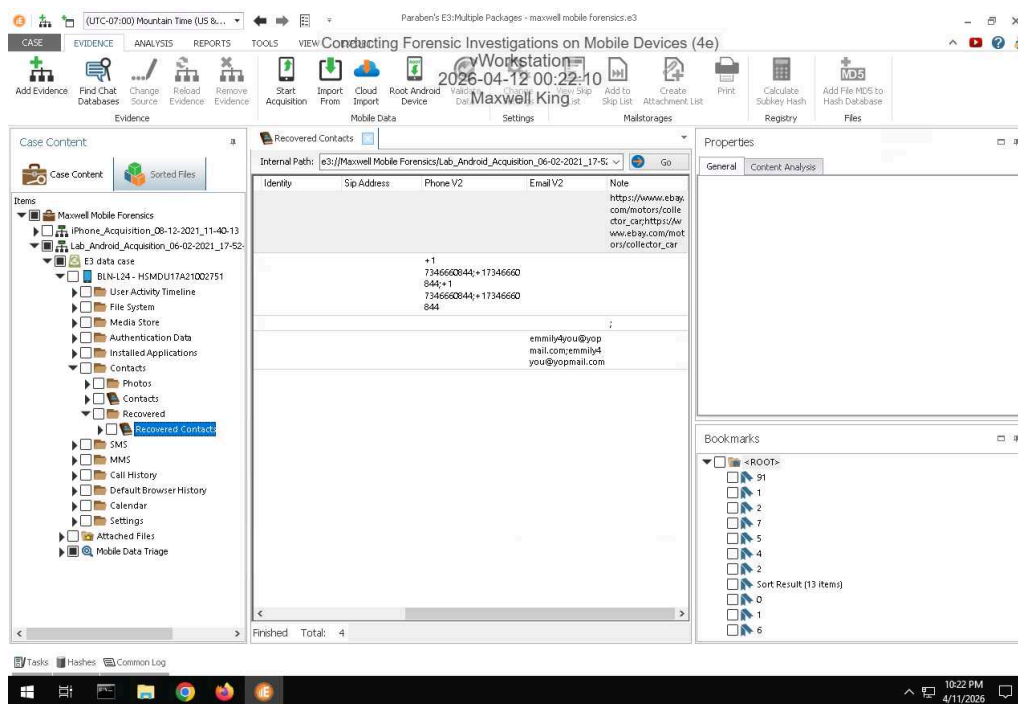

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

15. Make a screen capture showing the Installed Applications.

19. Make a screen capture showing the recovered contact information from the Android phone.

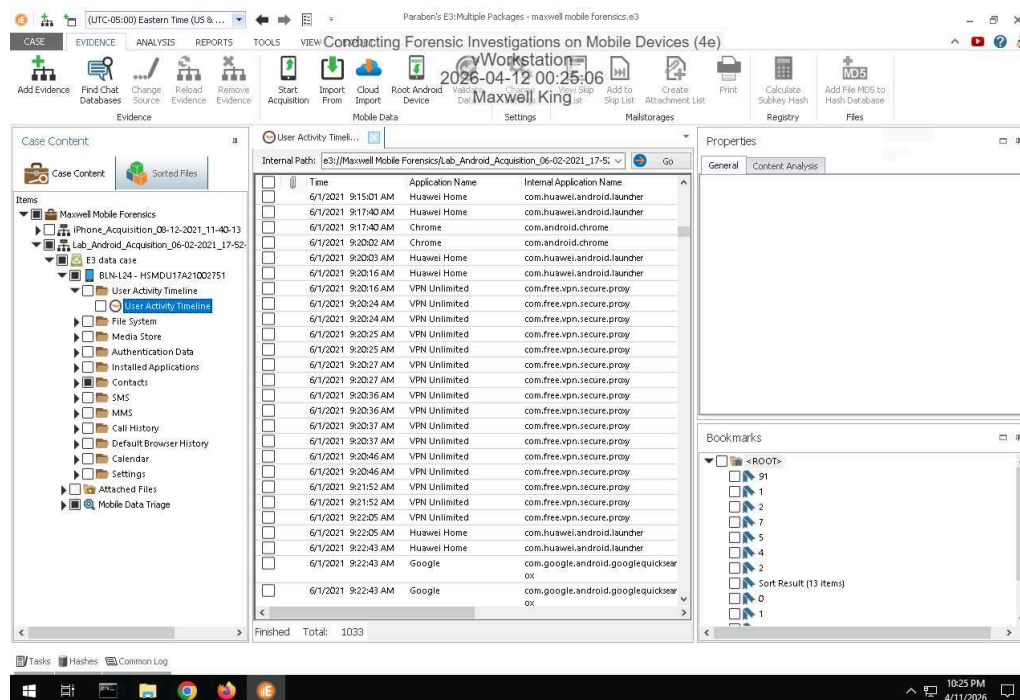

Part 2: Identify Forensic Evidence in Android Application Data

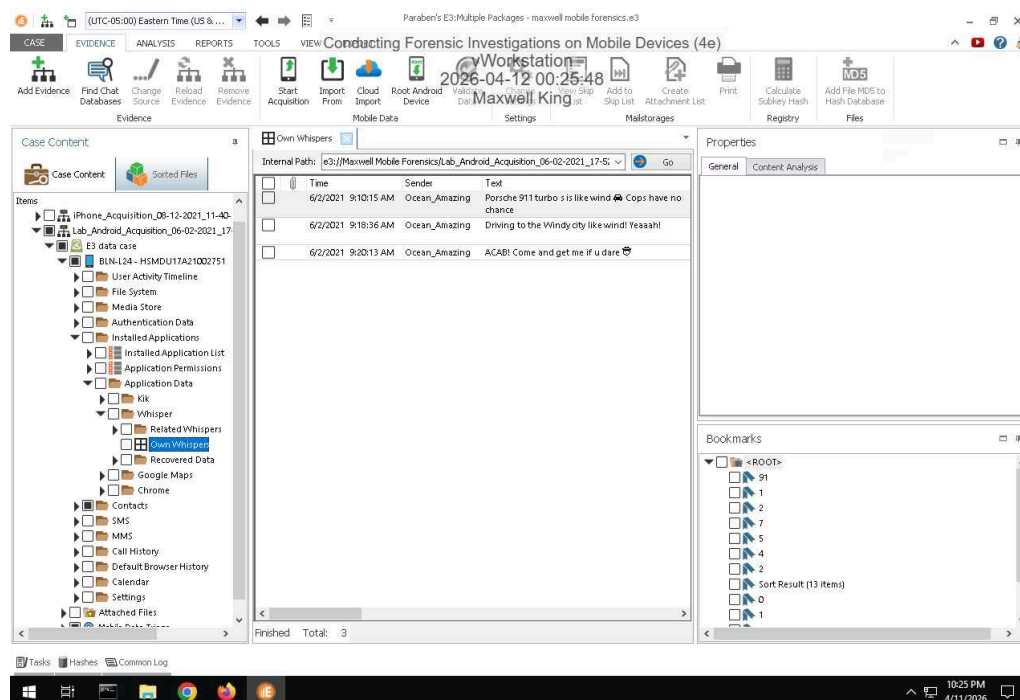

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

4. Make a screen capture showing the **User Activity Timeline** between 9:17:47 AM and 9:24:51 AM on 6/2/2021.

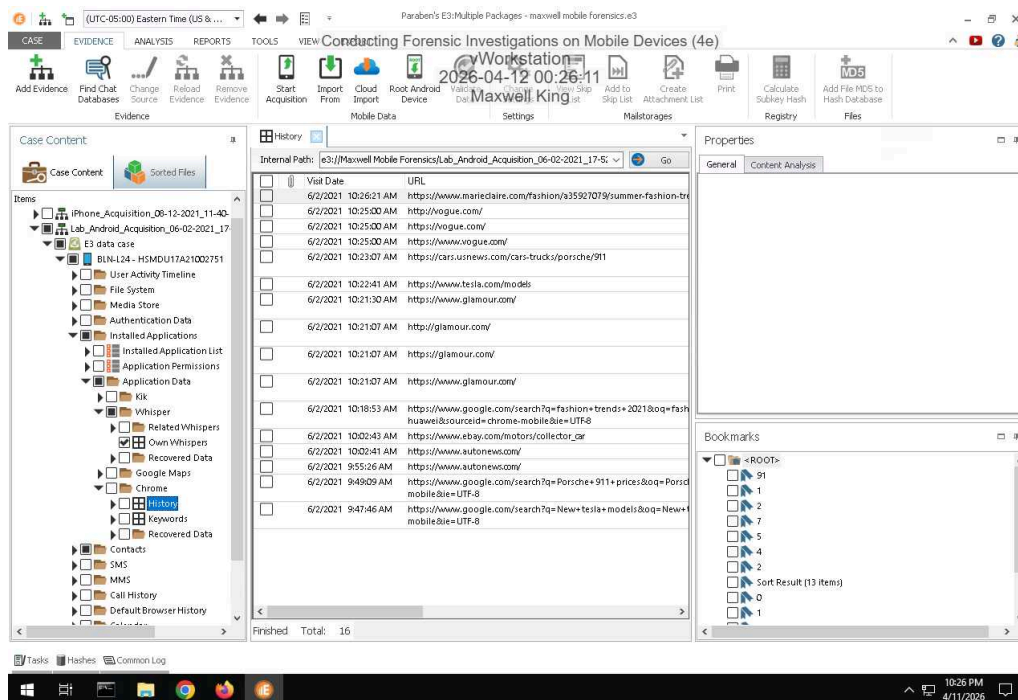

7. Make a screen capture showing the contents of the Own Whispers grid.

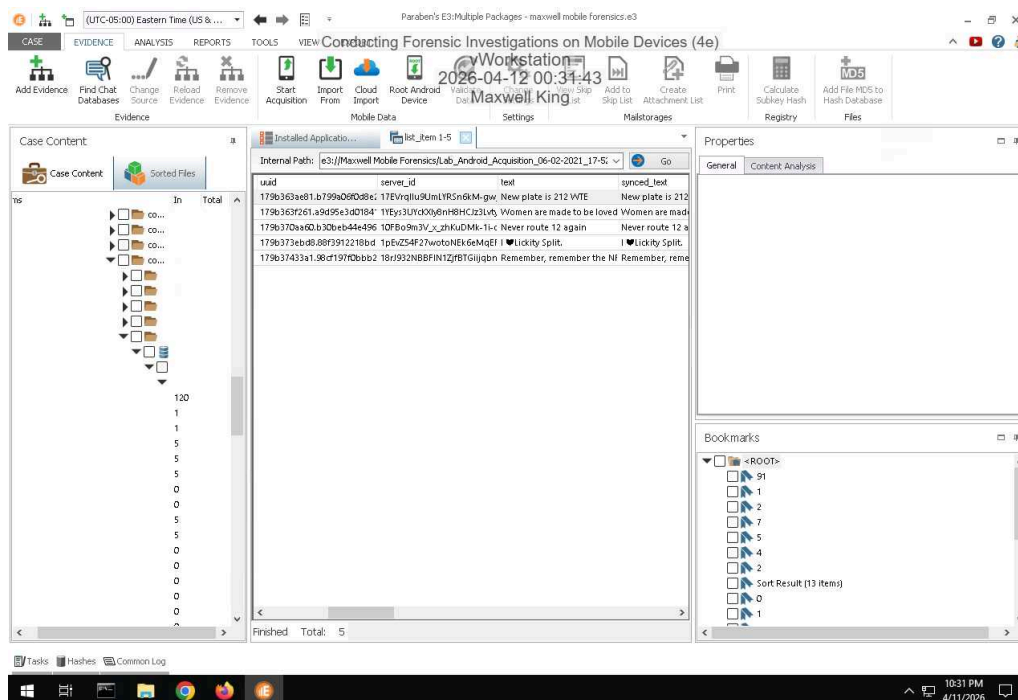

Conducting Forensic Investigations on Mobile Devices (4e)

Digital Forensics, Investigation, and Response, Fourth Edition - Lab 08

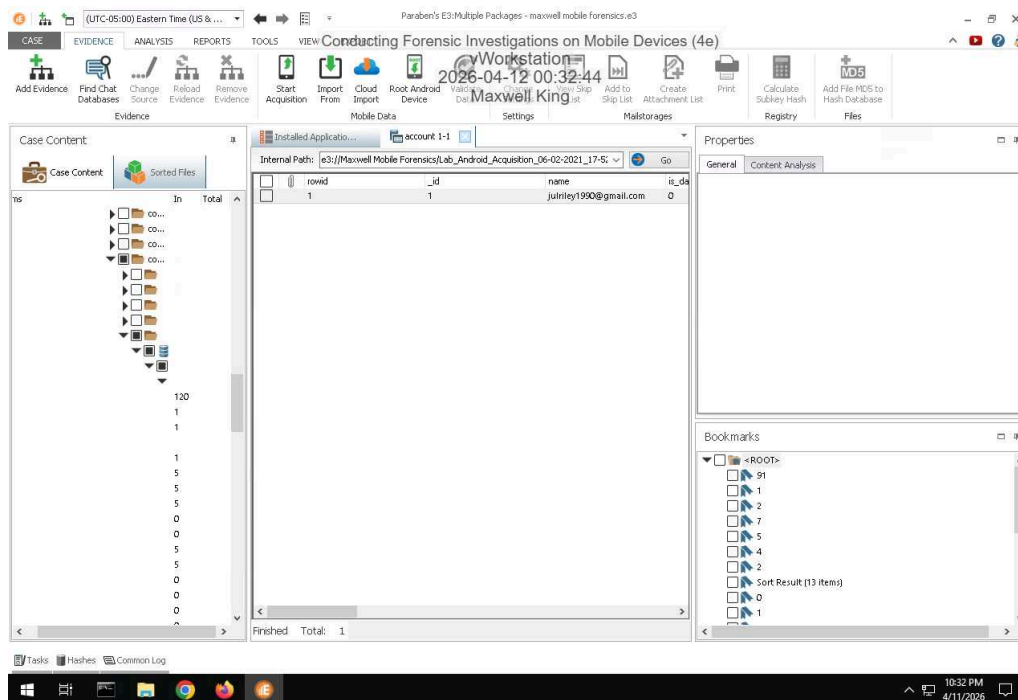

10. Make a screen capture showing the contents of the History grid.

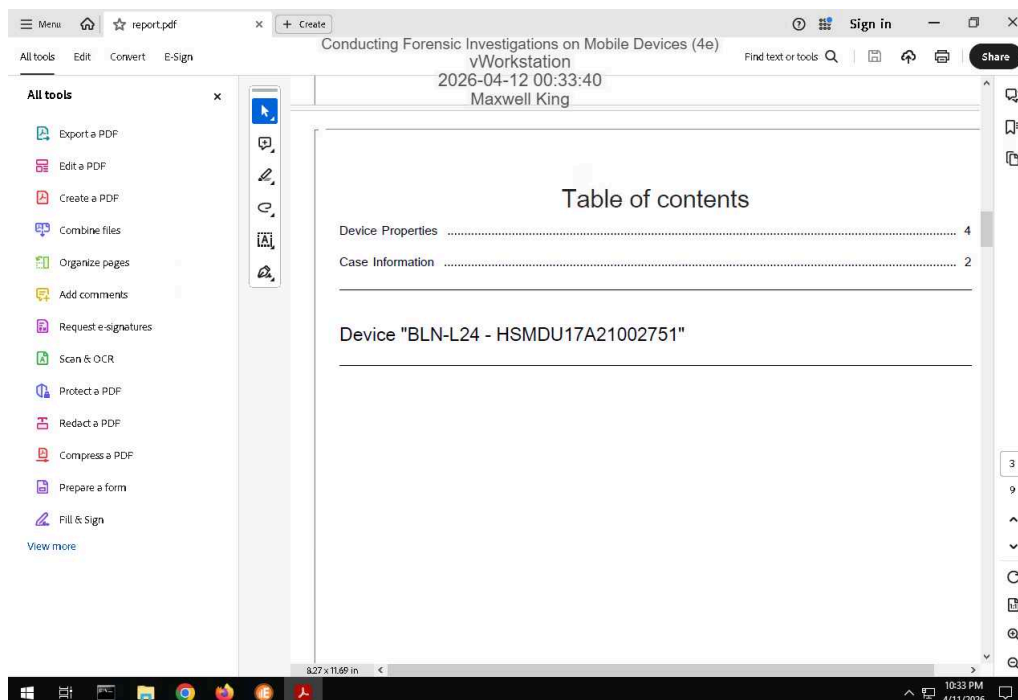

17. Make a screen capture showing the contents of the list_item 1-5 table.

20. Make a screen capture showing the Keep Notes account owner.

23. Make a screen capture showing the Investigative Report's Table of Contents.

Section 3: Challenge and Analysis

Part 1: Research Report Writing for Digital Forensics

Prepare a brief summary of the appropriate structure and best practices for preparing a digital forensics report.

A digital forensics report should be clear and organized so anyone can understand it. It typically includes a case summary, the methods and tools used, the findings, and a conclusion. The investigator should document everything they did step by step and include screenshots as evidence. Language should be simple and factual, avoiding personal opinions. The goal is to present the evidence accurately so it can hold up in a legal setting. Keeping a proper chain of custody and using reliable tools are also important best practices.

Part 2: Draft a Forensic Report

Case Summary

This investigation involved analyzing smartphones seized from two suspects in an organized car theft operation known by the codenames Bonnie and Clyde. Using Paraben's E3, I examined an iPhone belonging to Clyde and an Android phone belonging to Bonnie for evidence related to the car thefts.

Findings and Analysis

On Clyde's iPhone, I found text messages referencing specific cars and locations, calendar events with car icons, notes about license plates known to police, and 13 photos of cars with license plates. On Bonnie's Android, I found ICE contacts confirming the phone's owner, an installed eBay Motors app, Whisper messages referencing a Porsche 911 and the Windy City, Chrome browser history showing searches for luxury cars, and Keep Notes entries referencing license plate numbers. A Gmail address was also recovered from the Keep Notes database, which may identify Bonnie's real identity.

Conclusion

The evidence found on both devices strongly supports the suspects' involvement in an organized car theft operation. The phones contained coordinated communications, photos of stolen vehicles, and records of license plate tampering, all of which could be used to build a case against both suspects.
